As an experienced IT consultant with a client-centered approach, I am highly enthusiastic about programming and dedicated to delivering exceptional results. Through my previous work experience and personal interests, I have gained extensive expertise in managing diverse systems and overseeing company structures, both hardware and software. I am known for my exceptional attention to detail and strong communication skills, which allow me to ensure outstanding user experiences. I am particularly interested in web development roles, as I am driven to create products that are user-friendly and effective. My enthusiasm for programming and focus on delivering high-quality results make me well-suited for any tech-oriented position. I look forward to expanding my programming knowledge and experience

Skills HTML - CSS - JAVASCRIPT - NODE.JS - JEST | POSTGRESQL - EXPRESS | REACT - TAILWIND | GIT - GITHUB |

Currently getting familiar with: DART - FLUTTER | TYPESCRIPT

Experience

FEB 2023 - MAY 2023

Northcoders - Web Development

Northcoders is an immersive 13-week bootcamp designed to equip aspiring tech professionals with the skills and knowledge they need to succeed in web development. With a focus on progressive learning, the program is packed with daily tasks, mini-projects, and portfolio-worthy material that challenges and inspires students every step of the way.

Personally, I found the education to be intense and rewarding, with a comprehensive curriculum and a hands-on learning approach that provided practical experience in web development. The knowledgeable teachers and tutors were always available to offer guidance and support, helping me to build a strong portfolio and gain valuable insights on how to learn more efficiently.

Thanks to Northcoders, I now feel fully job-ready and confident in my ability to tackle complex web development challenges. The experience has been transformative, not just in terms of my technical skills, but also in terms of my mindset and approach to learning. I would highly recommend this bootcamp to anyone looking to break into the tech industry and make a meaningful impact.

Projects:

 [Personal Website](#)   Windows98 themed personal site to show my CV, projects, social links etc

 [Face Recognition](#)   Using Clarifi API for face detection, will outline matches using AI

 [Blocklist](#)    Mobile application for interactive task management
